

RANGER REPORT

July 18- July 26, 2015

Hello everyone!

Well the dog days of summer have arrived and aside from the heat, the fish are letting us know also. The catfish bite is strong from 1-5 a.m. and slowing way down during the day time. The best bait is still Sonnys stink bait and chicken liver has been effective too. The crappie and bluegill bite is the best at sunset now with crawler chunks being the best bait. The bass bite has moved to deeper water using deep diving crank baits. On a side note, we ask that boaters and kayakers be mindful of fishermen on the docks and do not get to close to docks in use. Stop in at the bait shop and see all the new Coleman products and fishing tackle Rebecca and Pat have just put out for sale.
