

Ranger Report

Hello all! This is Ranger Eric with an update for the fishing members of the SBFA. The fishing is hot! The rainbow trout have been stocked and this is a larger group of fish! They started to feed today once the clouds broke and the lure of choice besides the Berkley strike bait in gold, was a rooster tail spinner in the blue and silver combination. Kastmaster spoons were also successful with the color of choice being silver today. It was also nice to see members using crawlers catching some nice channel cats and bluegills. We also had a number of large crappies caught from the docks using hot pink jigs. All of these baits can be found in our bait and tackle shop. Stop in and see Pat and Rebecca and they will get you outfitted! Now we have something for everyone here, if by chance you are not in to fishing or just want to take a break and go for a walk around our beautiful lake, bring some binoculars, we have all sorts of native and winter migrating birds now staying at the lake! See how many species you can identify! If you are into walking, starting at the bait store, it is exactly 1.1 miles to walk around the lake. Come on out and enjoy! While you are walking or fishing say hello to our new rangers, Ranger Dave is our lead on day shift and Ranger Rob is our ranger working the afternoon shift. They both are excited to be working these positions and want to assist making your visits enjoyable!

Ranger Eric

Creel Report:

111 Rainbow trout

6 Channel cats

6 Bluegills

14 Crappie
