

RANGER REPORT
February 23 – March 1, 2015

Hello! This is Ranger Eric with your weekly SBEA fishing report! We have just had our last trout stocking of the season and they are beauties! This was a larger stocking and fishing should be good till the water starts to warm up in late spring. With that being said we ask the fishermen to please not throw any trout caught back into the lake. Please keep them and enjoy them for dinner! The creel limit will still be 4 trout. We are seeing more cats caught along with a few more bluegills too. Seems the fish think spring may be coming early! With spring around the corner and weather warming up the trout will switch and hit larger baits. I would use pinkie minnows with slip bobbers or just on a bare hook. With our recent snowfall please use caution walking on and off the docks, they can be slick! Good luck everyone and please take pics of your catch! We want to see your success!
