

**RANGER REPORT**  
**January 10 – January 16, 2015**

**What a great and warm weekend! This is Ranger Eric sending you the SBEA fishing report. With the warm weather and the ice on the lake melting fast, the trout picked up the bite and were hitting on blue and white tear drop jigs and crawlers. Large crappies were being caught using pinky minnows on slip bobbers. The south east corner and north east corner were the hot spots and the west side of the island road too. We even had some larger cats caught Saturday afternoon on crawlers! Our bait store is stocked and ready for your fishing needs, bobbers and tear drop jigs you name it! Drop in and see Pat and Rebecca for up to date info on the fishing! Remember you're net since the ice is melting fast and good luck landing the big ones!**
