

## RANGER REPORT

March 2018

Hello everyone!

We hope everyone's holidays were great! Old man winter finally arrived and froze up our lake! With that being said absolutely no one is allowed out on the ice! It is thin and very dangerous! The docks can also be slick so use caution while fishing. Trout can still be caught where there is no ice. The peach colored trout dough bait is working well as are minnows too.

Weekly Creel: Trout 187, Total 187

Take care and good fishing! Ranger Eric
